RE: Acceptance of Amended Notice to Move 24'x48' Mobile Trailer from Plant to Quarry
ML 35572-BSLS

Dear Mr. Brokke,

On May 24, 1999, you notified the Division of Oil, Gas & Mining of your intent to move a 24'x48' mobile trailer from the Plant site to the Quarry site at your Cricket Mountain operation. I understand that the trailer will be relocated to the NW4NE4, Section 36, T21S, R10W, SLB&M. The described land lies within your limestone mineral lease, ML 35572.

Article VI of the lease enables Continental Lime Inc. to use reasonably and prudently the surface of the lands as may be necessary to mine and dispose of the leased substances, including the construction or erection of essential structures and buildings. The usage which you propose in your May 24th Amended Notice to the Division of Oil, Gas & Mining appears consistent with the lease and is authorized by the Trust Lands Administration.

However, you are required to also notify other parties having an interest in the surface of the lands of your proposed action; namely, trust lands Grazing Permittee Lee. R. Barton, et. al., 122 West Union Street, Manti, UT 84642.

Sincerely,

John T. Blake
Mineral Resources Specialist
